

DustBind DC25

Re-workable, “wetted” road surface treatment

- Eliminate dust but retain grade-able surface
- Reduce Water Usage by >70%
- Lower Road Management Costs

Treatment Overview

DustBind DC25 is formulated to reduce dust on loose and aggregate road surfaces. This synthetic fluid controls dust by providing a long term wetted surface. Any soil or aggregate can be treated to create a long-term, re-workable solution that coats and agglomerates particulates, weighing them down, like water, without evaporating or freezing. Works well on heavy haul roads to light duty roads with difficult to treat areas.

Product Application

DustBind DC25 is applied to a lightly graded surface. Utilizing pressurized spray bars and tank trucks to direct the treatment directly on the driving surfaces. Treatment rates and product usage is dependent upon road surface, traffic, weather and base and sub base structural integrity.

Persons Chemical Supply can provide equipment for application and specialized training to meet job requirements.

Logistical and Handling

DustBind DC25 can be delivered in rail car, bulk tanker or 1000 litre disposable bulk bins. Local tank and storage facilities are for rent or purchase. On site tankage can be setup as required to meet any job specifications.
