

ErosionLock EL250

Colourless Cross-linked Nanoparticle Stabilizer

- Control Loss of Storage Piles
- Eliminate Fugitive Dust
- Long Lasting Treatment

Treatment Overview

ErosionLock EL250 is formulated to bind loose materials together in a solid yet flexible surface structure. This cross-linked nanoparticle creates strong bonds between surface material, eliminating erosion, dust and unwanted runoff.

ErosionLock EL250 is designed to penetrate shallowly into the surface providing a flexible yet resilient crust. This waterproof crust provides a long lasting barrier between the storage pile and the environment.

Product Application

ErosionLock EL250 is applied topically in a dilute solution. Utilizing pressurized spray to reach high storage piles. Treatment rates and product usage is dependent upon pile surface slope, material, and weather.

Persons Chemical Supply can provide equipment for application and specialized training to meet job requirements.

Logistical and Handling

ErosionLock EL250 can be delivered in bulk tanker or 1000 litre disposable bulk bins or 200 L drums. Local tank and storage facilities are available for rent or purchase. On site tankage can be setup as required to meet any job specifications.

Safety and Environment

A Material Safety Data Sheet containing detailed information about this product is available upon request.
